

ANT SET-UP

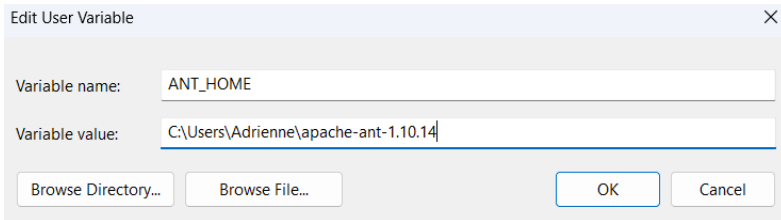

1.) Download the zip file from here <https://ant.apache.org/bindownload.cgi>

1.10.14 release - requires minimum of Java 8 at runtime

- 1.10.14 .zip archive: [apache-ant-1.10.14-bin.zip](#) [PGP] [SHA512]

2.) Extract it anywhere you like and copy the path

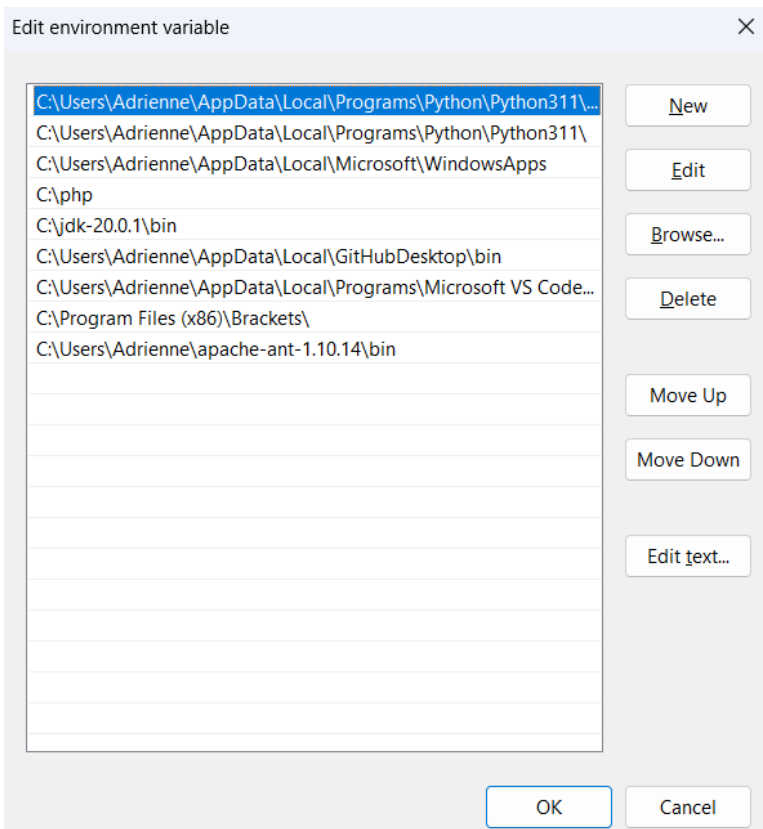

3.) Open environment variables and add new variable. Make sure the variable name is EXACTLY **ANT_HOME**

4.) Save the variable and then copy the bin path of Apache Ant

5.) Click the Path user variable and click edit

6.) Add the bin path and click OK

7.) Check in cmd using the command **ant -version**

```
C:\Users\Adrienne>ant -version
Apache Ant(TM) version 1.10.14 compiled on August 16 2023
```
